## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1724

The Bustamante publication (document No. 10) listed on the IDS filed February 6, 2001 has not been considered because Applicant has failed to provide a copy of this document, as required by 37 CFR § 1.98 and M.P.E.P. § 609. Also, Applicant should note that document No. 9 appears to be identical to document No. 4.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 14-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. See M.P.E.P. § 2173.05(q).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-26 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The term "use" (claims 14-26) is vague, and indefinite as to the limitations intended.

Art Unit: 1724

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 2, 6-8, 11-15, 19-21 and 24-26 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Rafter et al (U.S. Patent No. 5,858,246) or Latimer et al (U.S. Patent No. 6,054,059). See col. 2, lines 30-32 and col. 7, line 30 of Rafter et al; and col. 14, line 19 and col. 16, lines 6-8 of Latimer et al.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-5, 9, 10, 16-18, 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rafter et al or Latimer et al. Each of the references discloses the claimed invention with the exception of the surface density of Al-OH groups on the

Art Unit: 1724

alumina (claims 3-5 and 16-18), and the particle size of this alumina (claims 9, 10, 22 and 23). However, the exact surface density of Al-OH groups on the alumina employed in either reference system, and the exact particle size of this alumina are not seen to materially affect the overall results of either reference process, or to produce any new and unexpected results; and are therefore deemed to be obvious matters of choice, which are insufficient to patentably distinguish the claims.
